Computer Methods and Programs in Biomedicine, 29 (1989) 285–286
Elsevier

Subject index

Accelerated Failure Time, (29), 51
Algorithm, (29), 143
Alkaline filter elution technique, (29), 235
Artificial intelligence, (29), 95
ASCII interface, (29), 223

BASIC, (29), 229
BASIC program, (29), 37
Bayes' theorem, (29), 15
Biological model, (29), 161
Blood pressure, (29), 21
Bovine leukemia virus, (29), 251

Cardiovascular hemodynamics, (29), 161
Cardiovascular model, (29), 21; (29), 95
Cerebral blood flow, (29), 59
Chronic leukemia, (29), 273
Clinical laboratory, (29), 251
Clinical pharmacology, (29), 115
Computer education, (29), 89
Computer model, (29), 161
Computer program, (29), 173; (29), 179; (29), 273
Computer simulation, (29), 15
Confidence region, (29), 37
Correlational analyses, (29), 37
Curve fitting, (29), 251

Data acquisition, (29), 153
Data management, (29), 251
Decision support, (29), 1
Decision-support system, (29), 75
Demographics, (29), 251
Diabetes mellitus, (29), 75
Diagnosis (computer assisted), (29), 15
Digital signal processing, (29), 129
Dosimetry, (29), 205
Drug level monitoring, (29), 115
Dynamic model, (29), 75
Dynamic system, (29), 95

Education, (29), 43
Electrical analogy, (29), 161
Ellipse plotting, (29), 37
Experimental design, (29), 173
Expert system, (29), 15; (29), 89; (29), 95; (29), 115
Exponential distribution, (29), 245

Fast Fourier transform, (29), 31; (29), 129
Fluid flow, (29), 161
Formula of survival, (29), 273
FORTRAN, (29), 191
FORTRAN programming, (29), 129

Gamma distribution, (29), 245
Generalized log-gamma regression, (29), 51

[^{3}H]Autoradiography, (29), 71
Hierarchical analysis of variance, (29), 179
Hypertension therapy, (29), 89
Hypertext, (29), 1

IBM PC, (29), 191
Image analysis, (29), 59
Imaging, (29), 257
Insulin-dependent diabetes mellitus, (29), 197
Insulin therapy, (29), 75
Ionic transport, (29), 43

Knowledge base, (29), 115

Laboratory automation, (29), 235
Limiting dilution method, (29), 173
Liquid scintillation counting, (29), 235
Logistic regression, (29), 197
Log-logistic regression, (29), 51

Macintosh, (29), 191
Mathematical model, (29), 59
Membrane protein, (29), 43
Microalbuminuria, (29), 197
Microcomputer, (29), 31; (29), 37; (29), 71; (29), 153
Microproteinuria, (29), 197
Model order, (29), 143
Monte Carlo, (29), 257
Monte Carlo simulation, (29), 205; (29), 245
Multichannel scaling system, (29), 217

Networking, (29), 223
Nonlinear electrical model, (29), 161
Non-linear estimation, (29), 191
Non-parametric fitting, (29), 229

Packard 1900CA liquid scintillation analyzer, (29), 235
Parameter estimation, (29), 143

Author index

Alcayaga, J., see Iturriaga, R. (29) 37

Boroujerdi, M.A., see Deutsch, T. (29) 75
Bourne, D.W.A.
BOOMER, a simulation and modeling program for pharmacokinetic and pharmacodynamic data analysis (29) 191

Carson, E.R., see Deutsch, T. (29) 75
Carson, S.D.
BASIC program for non-parametric fitting of user-defined functions to experimental data with plotting of results (29) 229
Chapman, J.-A., see Ciampi, A. (29) 51
Chard, T.
The effect of dependence on the performance of Bayes' theorem: an evaluation using a computer simulation (29) 15
Chung, S.J.
Computer-assisted predictive mathematical relationship between time after diagnosis and survival probability in patients with chronic leukemias (29) 273
Ciampi, A., Chapman, J.-A., Hogg, S.A. and Thiffault, J.
GENCOV: a Fortran program that generates randomly censored survival data with covariates (29) 51
Cooper, J.L., see Sognier, M.A. (29) 235

Deutsch, T., Boroujerdi, M.A., Carson, E.R., Harvey, F.E., Sonksen, P.H., Tamás, G. and Williams, C.D.
The principles and prototyping of a knowledge-based diabetes management system (29) 75
Diez-Martínez, O., see Holmgren, M. (29) 43
Dupont, C., see Jacobs, R.M. (29) 251

Ediss, C., see McQuarrie, S.A. (29) 217
Ensinger, B.A., see Robboy, M.W. (29) 223

Farré, M., see Moreno, V. (29) 89

Gitelman, D.R. and Toga, A.W.
A mathematical model and image analysis technique for calculating regional cerebral blood flow (29) 59
Goeller, C.J. and Sinton, C.M.
A microcomputer-based sleep stage analyzer (29) 31
Goldstein, L.J. and Rypins, E.B.
Nonlinear SPICE models for physiologic systems (29) 161
Groth, T., see Wiener, F. (29) 115

Hallquist, I., see Wiener, F. (29) 115
Harvey, F.E., see Deutsch, T. (29) 75
Ho, P.W.M., see Pun, K.K. (29) 197
Hogg, S.A., see Ciampi, A. (29) 51
Holland, B.
Monte Carlo simulation of the power of a test for the exponential distribution of survival times (29) 245
Holmgren, M. and Diez-Martínez, O.
Simulation of ionic transport mediated by membrane proteins for educational purposes (29) 43

Iturriaga, R., Alcayaga, J. and Zapata, P.
CONFREG: a BASIC program for calculating and plotting confidence regions based on correlational analyses (29) 37

Jacobs, R.M., Smith, G.J.D., Valli, V.E.O., Dupont, C. and McCormick, W.A.
A program for storage and retrieval of demographic, sample, clinical laboratory, and restriction endonuclease map data (29) 251
Jeanprêtre, N. and Kraftsik, R.
A program for the computation of power and determination of sample size in hierarchical experimental designs (29) 179
Jenkins, J.S., see Valcke, C.P. (29) 143
Johnson, T.K. and Vessella, R.L.
On the possibility of 'real-time' Monte Carlo calculations for the estimation of absorbed dose in radioimmunotherapy (29) 205

Koziol, J.A.
Determination of monoclonality from sequential dilution assays (29) 173
Kraftsik, R., see Jeanprêtre, N. (29) 179

Linkens, D.A., see Mansour, N.E. (29) 21
Ljungberg, M. and Strand, S.-E.
A Monte Carlo program for the simulation of scintillation camera characteristics (29) 257
Lütkenhöner, B. and Ross, B.
Software manipulations to speed up a real-valued fast Fourier transform algorithm (29) 129

Mansour, N.E. and Linkens, D.A.
A self-tuning Smith predictor applied to the control of blood pressure: simulation studies (29) 21
McCormick, W.A., see Jacobs, R.M. (29) 251
McQuarrie, S.A. and Ediss, C.
An inexpensive microprocessor-controlled multichannel scaling system for in vivo radiotracer studies (29) 217

Meng, R.L., see Smith, T.C. (29) 153
Moorhead, J.F., see Pun, K.K. (29) 197
Moreno, V., Farré, M. and Salvá, P.
A program for oriented treatment of essential hypertension (29) 89
Mortimer, Ö., see Wiener, F. (29) 115

Pun, K.K., Ho, P.W.M., Varghese, Z. and Moorhead, J.F.
Logistic regression model for the assessment of microalbuminuria and microproteinuria in insulin-dependent diabetic patients at risk (29) 197

Rane, A., see Wiener, F. (29) 115
Robboy, M.W. and Ensinger, B.A.
An automated patient control and data management system (29) 223
Ross, B., see Lütkenhöner, B. (29) 129
Rypins, E.B., see Goldstein, L.J. (29) 161

Salvá, P., see Moreno, V. (29) 89
Sinton, C.M., see Goeller, C.J. (29) 31
Smith, G.J.D., see Jacobs, R.M. (29) 251
Smith, T.C. and Meng, R.L.
Experimental data acquisition and manipulation by microcomputer (29) 153
Sognier, M.A. and Cooper, J.L.
The automation of routine calculations and graphing for alkaline filter elution analysis on a computer-controlled liquid scintillation analyzer (29) 235
Sonksen, P.H., see Deutsch, T. (29) 75
Strand, S.-E., see Ljungberg, M. (29) 257

Tamás, G., see Deutsch, T. (29) 75
Thiffault, J., see Ciampi, A. (29) 51
Timpka, T.
Introducing hypertext in primary health care: a study on the feasibility of decision support for practitioners (29) 1
Tjurmin, A.V.
Program package for processing of autoradiography data (29) 71
Toga, A.W., see Gitelman, D.R. (29) 59

Valcke, C.P., Jenkins, J.S. and Ward, D.S.
Recursive identification of lung parameters (29) 143
Valli, V.E.O., see Jacobs, R.M. (29) 251
Varghese, Z., see Pun, K.K. (29) 197
Vessella, R.L., see Johnson, T.K. (29) 205

Ward, D.S., see Valcke, C.P. (29) 143
Widman, L.E.
Expert system reasoning about dynamic systems by semi-quantitative simulation (29) 95
Wiener, F., Groth, T., Mortimer, Ö., Hallquist, I. and Rane, A.
A knowledge-based information system for monitoring drug levels (29) 115
Williams, C.D., see Deutsch, T. (29) 75

Zapata, P., see Iturriaga, R. (29) 37
